

## WHAT IS GEOPATHIC STRESS?

Earth's vibrations sustain planetary life, but when they are disturbed - either naturally or artificially, by weak electro magnetic fields created by subterranean running water, fault lines, grid lines, underground cavities or certain mineral concentrations, they become distorted and harmful to living organisms. These are natural zones within which we live. It is when we spend extended periods of time in these zones, such as sleeping or sitting at work, that they contribute to health problems. It is important to understand that Geopathic Stress does not create disease but severely compromises our immune system, so that over time we are prone to developing illnesses.

Man-made disturbances to the earth's magnetic field can be caused by mining, foundations for tall buildings, underground transport systems, quarries and public utilities such as sewage, water mains etc.

Magnetic grid lines also emit disturbed magnetic fields and include the Hartmann Grid, Benker Grid, Curry Net and negative Ley lines – for more information see below.

## WHAT ARE THE EFFECTS OF GEOPATHIC STRESS ON HUMANS?

This disturbed radiation has been known to be harmful to humans. The most common indications being:

- ◆ Resistance to medical treatment
- ◆ Feeling run down and exhausted
- ◆ Nervousness
- ◆ Depression
- ◆ Loss of appetite
- ◆ Not wanting to go to bed and once in bed – insomnia, restless sleep, feeling cold, cramps, tingling in arms and legs, sleep walking, grinding of teeth and nightmares
- ◆ Upon waking, the feeling of fatigue with a fuzzy head and backache
- ◆ Bedwetting in children and continuous crying in babies
- ◆ Lowering of the immune system
- ◆ Malabsorption of nutrients sometimes causing allergies to food, drink and environmental pollution

## DETECTION

If you have any of the above symptoms or your home just does not 'feel right' in some area, or if you have noticed an increase in illness or depression since moving into your home or work environment, then you may be affected by Geopathic Stress. If you live close to a cell phone mast or radar station and/or have a wireless computer connection, you will almost certainly be impacted negatively by Electromagnetic Radiations.

*Please visit our Home Alignment section – a practitioner will be able to help you establish exactly what geopathic stresses are affecting you and your home. They will also be able to advise you on what remedies to use.*

## PROTECTION FROM ELECTROMAGNETIC RADIATION (EMF's) AND GEOPATHIC STRESS

Electromagnetic Frequency exposure is cumulative. While our bodies may withstand a certain amount of radiation from wiring and electronic equipment in the home, any other toxic source will add to the burden and destabilize the body. We need to do all we can do reduce the overall burden while improving the body's vitality and immune health.

## THE VORTEX CARDS ARE PROGRAMMED TO DRAMATICALLY ASSIST IN REDUCING THE BURDEN OF EMF EXPOSURE

We recommend the use of the following 4 Vortex Cards as well as the pendant for your basic protection:

### The Rainbow Card

The Rainbow card is designed to balance and harmonize the atmosphere of an entire house, office or small building. It is programmed with the necessary frequencies to negate the harmful effects of all four geopathic stress lines, the energy drainage from the Earth's grid work and electromagnetic radiation within its environment, and it creates a positive energy vortex which facilitates a flow of healing energy and creates an atmosphere filled with vitality. The energies harnessed in this card have been drawn from the highest source with the intent of creating an environment to harmonize with the raising frequencies of our planet.

### The Generator Card

In the presence of severe electromagnetic radiation *and* geopathic stress the Generator card may be used in addition to the Rainbow card. This card is designed to amplify the effects of all other cards and is programmed with energies which are conducive to environmental healing. The Generator card is particularly useful over Ley lines and grid intersection points.

### The Square Card

The Square card is used to provide personal protection from electromagnetic radiation and for energy magnification. It can be placed on electrical appliances to transmute the effect of electromagnetic radiation, in which case it pulls negative energy down into the Earth and grounds it. It is programmed to amplify the energies of the biological system, and is worn in the Vortex Pendant.

### The Cell Phone Card

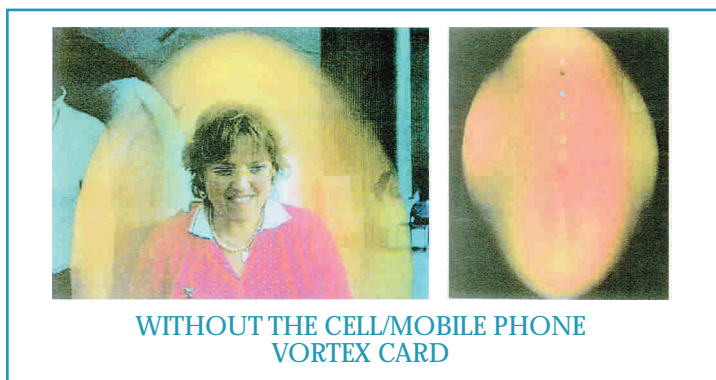

The Cell phone card is placed on or in a cell phone, TV cable or telephone line to transmute harmful electromagnetic radiation into energies which are beneficial to the biological system. This card offers substantially superior protection when compared to the number of "positive energy" devices which have appeared on the market.

### The Personal Protection Pendant

A smaller version of the Square card is worn on the body to protect the wearer from the negative energies that we come into contact with everyday and the plethora of EMF's that we are subjected to almost everywhere. It helps to strengthen and magnify the wearer's energy field. This card is worn by practitioners of energy healing and bodyworkers to protect them from the energies released during treatments. Increasingly, lay people are routinely wearing them as they go about their days. The card needs to be worn directly on the body for full effect. The most convenient way to wear the card is in one of our three specially designed pendants

## EMF RADIATIONS AND CELL/MOBILE PHONES

The most publicized source of electromagnetic radiations are mobile phones and mobile phone masts. Various research studies have identified the following harmful effects of mobile phones:

- ◆ Unexplained headaches and migraines
- ◆ Ear, throat and eye problems
- ◆ Tingling and burning sensations on ears and skin
- ◆ Numbness or pain on the side of the face, head and neck
- ◆ Fatigue, nausea and dizziness
- ◆ Feelings of confusion and stress
- ◆ Heat felt in the teeth
- ◆ Several reports of tumors located behind the ear or on the neck where the phone is held.

The Vortex Cell/Mobile Phone Card has been found to have a profoundly protective effect against electromagnetic frequencies (EMF's). In fact, the card actually strengthens the body and the energy field (subtle bodies).

## THE FOLLOWING TESTS HAVE BEEN DONE ON MOBILE PHONES AND THEIR USERS

### Applied Kinesiology testing

Applied Kinesiology or Muscle Testing has been used by health practitioners to evaluate the human body's response to external stimuli such as foods, substances and electromagnetic fields etc. In testing the Vortex Cell/Mobile Phone Card, we took into account the body's various energy systems such as the Meridians (known to the Chinese for centuries), the Chakra System as well as the Auric Field (subtle energy bodies that exist around the physical body, namely, the etheric, emotional, mental, spiritual and causal bodies which vibrate at a higher frequency than the physical body and which are invisible to the human eye. They are, however, seen by those who are gifted or trained in extra sensory perception).

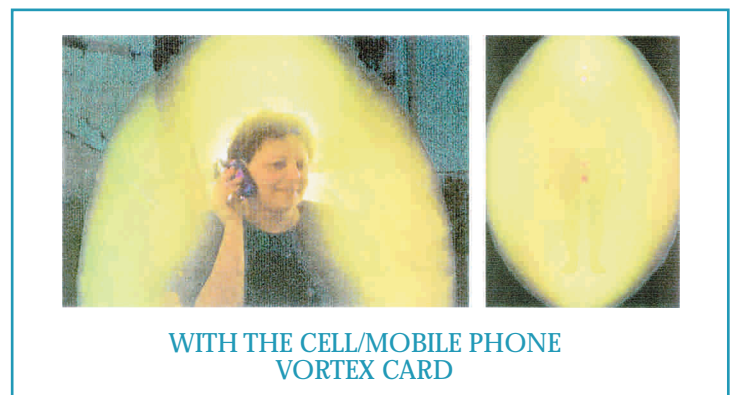

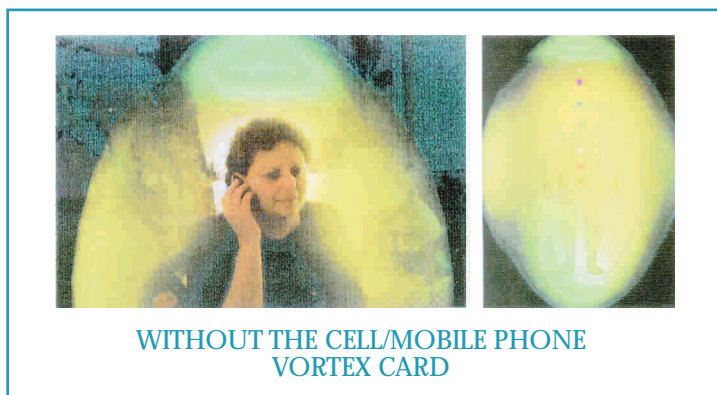

When a person is muscle tested with a mobile phone in their immediate environment, there is a neurological response causing the challenged muscle to test weak, even when the mobile phone is placed 5-6 feet away. This weakening increases as the instrument is brought closer to the body.

When the Cell/Mobile Phone Vortex Card is placed on the mobile phone the challenged muscles test strong and as the mobile phone approaches the body, the muscle actually continues to strengthen.

Tests indicate that this Vortex Card transforms the harmful radiation to a frequency which is beneficial to the physical body as well as the subtle energy bodies, chakras and meridians. This is a rare effect as most mobile phone protection devices only strengthen the physical body.

It has been shown that mobile phones drastically reduce the size of the human energy field, indicating the weakening effect on the body. When the Cell/Mobile Phone Vortex card is placed on the mobile phone, not only is the field restored, it is enlarged and strengthened.

## DETAILED INFORMATION ON VARIOUS GEOPATHIC STRESS SOURCES

### Geopathic Zones

When natural radiation rises through the Earth, its wavelength is distorted by weak electromagnetic fields emanating from subterranean running water, mineral concentrations, fault lines and underground cavities. Geopathic Zones can also be man-made. These zones are caused by electromagnetic fields emanating from structures such as high-tension power wires, satellite towers, and electrical street poles or fuse boxes.

### Personal Zones and Interference lines

Personal zones produce an energy that grates on the energy of a given person or animal, producing a chronic subtly annoying and irritating effect. Quick and positive changes occur when these are neutralized. It is strongly recommended that home-based businesses and office buildings be checked for such interference.

### The Hartmann Grid

Hartmann lines were discovered in 1950 by a German medical doctor, Ernst Hartmann. These lines run in a North-South orientation at +/-2m intervals, and in an East-West orientation at +/-2.5m intervals, forming a grid around the Earth. The junction of two Hartmann Lines is known as a grid knot. Harmful radiation is intensified at these junctions, and they are considered to be the worst place for an individual to sleep or work.

### The Benker Grid

The Benker Cubical System is named after Austrian researcher Anton Benker. The grid is formed by energy lines spaced +/-10meters apart and aligned magnetically in a North-South and East-West orientation. The electromagnetic walls of these "blocks" are about 1 meter in diameter and the radiation emitted by them is harmful to the immune system, particularly when exposed to points of intersection over extended periods of time.

### The Curry Net

The Curry net is named after Dr Manford Curry who discovered the lines, which form the net covering the Earth. These lines were originally a necessary, healthy part of the morphology of the planet. However, over the last 30 years they have become negatively charged due to manmade transmitters and power lines. They run 3-5 meters apart in a Northeast-Southwest and Northwest-Southeast orientation across the globe, getting closer together as they approach the equator. Curry Lines are most powerful when the sun is at the opposite end of the Earth. It is considered to be an extremely bad idea to sleep over them, because the body behaves as a battery and discharges energy to these lines. As a result the individual wakes after a full night's sleep feeling drained and exhausted.

### Ley lines

Ley lines originate below the Earth's surface, occurring between predominantly big, hollow natural landforms e.g. caves, volcanoes, lakes etc. Many spiritual centers are built on these lines in order to accentuate their power. Ley lines can however become toxic after deviating along power lines, roads, quarries and other manmade structures, and can become negatively charged when overlaid by streams, Hartmann knots, electrical towers, etc.

### Electromagnetic Radiation

Negative radiation can be emitted by electrical devices within a building (e.g. television sets, computers, broadband internet, electrical blankets, cell phones, etc), or from external sources (e.g. high tension wires, sub-stations, satellite dishes, cell phone towers, x-rays, etc.)

### Cell Phones

A cell phone is the only radiation-emitting consumer product that people intentionally hold against their heads. The electromagnetic radiation emitted is similar to microwave radiation used to cook food in a microwave. Current research has shown that 70% of the radiation emitted by cell phones is absorbed by the head, creating "hot spots" in the brain. Radiation from cell phones has also been linked to damage to the immune system, brain tumors, fatigue, headaches, rise in blood pressure, short-term memory loss and reduced learning capacity. Anybody with a genetic predisposition to cancer should not use a cell phone at all, as such a high level of radiation can set the process in motion.

### Black Streams

Earth energies, which have become contaminated along their course by manmade structures, e.g. landfills, burial sites, polluted streams, etc are known as Black Streams. These can easily be cleansed by the introduction of plant life into the affected area.

### Microwave Radiation (MW)

Microwave radiation is electromagnetic radiation (EM) which falls in the frequency range between 300MHz and 300GHz. Natural low-frequency EM fields come from two sources, namely, the sun and thunderstorm activity. However, at sufficiently high power densities, RF/MF energy can cause blindness and sterility and can alter the human body's circadian rhythms, immune system, and the chemical signals communicated through cellular membranes.

### Radar

Radar systems detect the presence, direction or range of moving objects. It is achieved by sending pulses of high frequency electromagnetic fields (EMF). Radars usually operate at radio frequencies (RF) between 300 MHz and 15 GHz. RF fields within this part of the electromagnetic spectrum are known to interact badly with the human body.

### Underground Water

Underground water flows in innumerable ways as a stream or groundwater, surfacing as springs, wells and wetlands. It can also be held back in underground caves, lakes or as a water table. Deep water may rise and not surface as in a blind spring. Water has a flowing, agitating character and if positive can be beneficial for short times. This also relates to water pipes.
